

## **RECIPIENTS OF THE 2008 ACTA STUDENT AWARDS**

A team of judges consisting of Acta Materialia, Scripta Materialia, and Acta Biomaterialia editors has completed the evaluation of nominees for the above award. Again, the competition was very keen and there were several excellent candidates. Selecting the winners was a challenging task. Several factors were considered in the evaluation of each nominee: the quality of paper, or papers, for which he or she was nominated, recommendation letters, and leadership potential. The awardees selected from papers published in the above three journals are:

### **ACTA MATERIALIA**

Dr. Daniel Kiener, Erich Schmid Institute, Austrian Academy of Sciences, Leoben, Austria. "A further step towards an understanding of size-dependent crystal plasticity: In situ tension experiments of miniaturized single-crystal copper samples," *Acta Materialia* 56, 2008: 580-592.

Dr. Jeremy K. Mason, Massachusetts Institute of Technology, USA. "Hyperspherical harmonics for the representation of crystallographic texture," *Acta Materialia* 56, 2008: 6141-6155.

### **SCRIPTA MATERIALIA**

Dr. Giovanni Bonny, SCK•CEN, Ghent University, Belgium. "On the  $\alpha$ - $\alpha'$  miscibility gap of Fe-Cr alloys," *Scripta Materialia* 59, 2008: 1193-1196.

### **ACTA BIOMATERIALIA**

Dr. Huinan Liu, Brown University, USA. "An in vitro evaluation of the Ca/P ratio for the cytocompatibility of nano-to-micron particulate calcium phosphates for bone regeneration," *Acta Biomaterialia* 4, 2008: 1472-1479.

The editors would like to congratulate the awardees and thank all the nominees for their participation. We wish them all the best in their careers.
